## About Noki Lock

Noki Lock, located in Waalwijk - The Netherlands, supplies lockers and cupboards in all conceivable dimensions, sizes, colors, and numbers. From lockers that must be vandalism-proof to design lockers that fit perfectly into your interior: Noki Lock has or makes them. For example, the company supplies lockers to many companies and educational institutions so employees, pupils, and students can always ensure their belongings are safe during work or class.
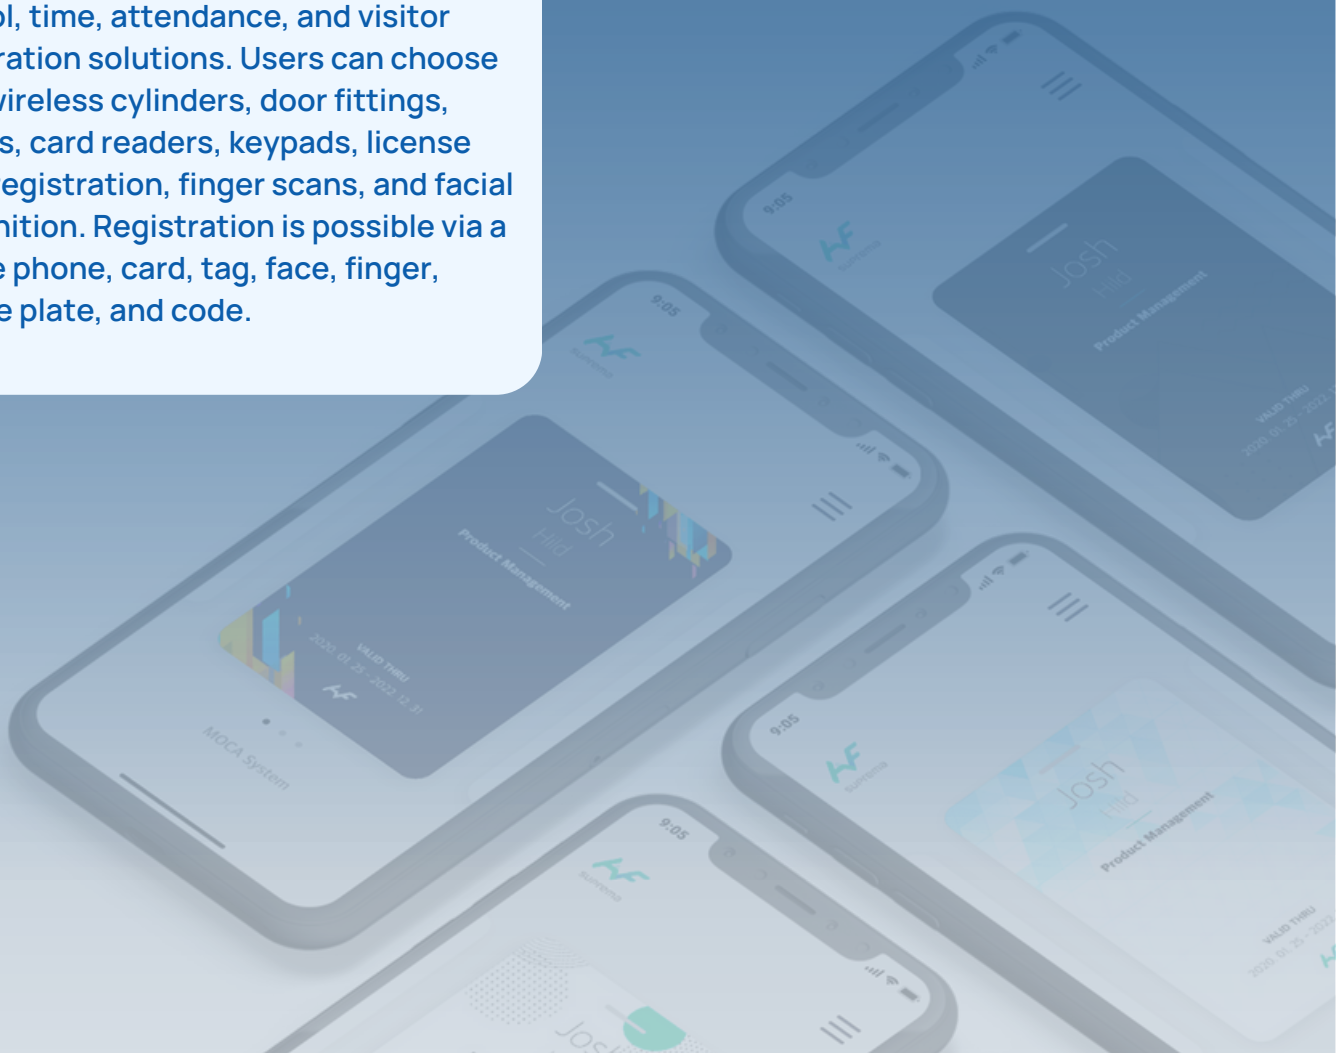

## About EasySecure

EasySecure is a specialist in the field of identity management. Its scalable cloud platform integrates and delivers access control, time, attendance, and visitor registration solutions. Users can choose from wireless cylinders, door fittings, lockers, card readers, keypads, license plate registration, finger scans, and facial recognition. Registration is possible via a mobile phone, card, tag, face, finger, license plate, and code.

## Struggles with physical keys

Many companies work with lockers that you must open and close with physical keys. Physical keys can be lost or stolen. You always have to hand over keys when people leave employment or have new ones made for new employees.

Do you work with many flexible personnel, such as temporary workers or freelancers who must be on location regularly? Then it is difficult with physical key management to monitor who has access to which areas and lockers.

# A complete solution for access control and all lockers

The collaboration between Noki Lock and EasySecure creates a convenient, clear, and safe complete solution for access control and locker management. EasySecure provides access control and time registration. The EasySecure software controls the Noki Lock lockers in the changing rooms. You can use a card, mobile phone, drop, face or fingerprint for access control and opening and closing a locker.

You will find the joint solution of Noki Lock and EasySecure, mainly in production companies, large warehouses, and storage facilities. However, the system is also very useful in the transport and logistics sector and ideal for almost all companies with a changing and flexible workforce.

With the integration of Noki Lock and EasySecure, you benefit from the following:

- Authorized employees can use the same drop or card for various purposes. They gain access to locations and rooms but can also use it to open and close their lockers.

- No more struggles with making, transferring, or replacing physical locker keys.

- Locker management and access control can be purchased as separate systems or a complete solution.

- One point of contact for your lockers, access tokens (cards, drops), and hardware. You don't have different systems running side by side, saving you much time and administrative work.
