CUSTOMER EXAMPLE: GOLDEN ROCK

The idea for the Golden Rock Resort saw the light of day in 2019. That was when the plan to build a resort on St. Eustatius, one of the islands in the Dutch Caribbean, was born. It started with two buildings and 16 hotel rooms per building, a number that will be expanded to 32 in the near future. After the completion of the first building, Golden Rock began the search for smart locks for the hotel.

After a tour of other companies, the idea came up to see what EasySecure could do for the resort in this area. One of the reasons for choosing EasySecure was a successful cooperation in Africa that had already existed for years. This has already shown that EasySecure is a personable company that works quickly and accurately.

Intelligent locks

The integration between Golden Rock's PMS system and EasySecure's intelligent access system ensures a smooth welcome and optimal hospitality. When a visitor makes a reservation and arrives at the hotel to check in, a card is immediately created that the guest uses to open the door to their hotel room. This can also be done via mobile phone. In this way, the physical key becomes superfluous. Is the stay is over? Then the guest can hand in the card or take it home with them for their holiday album.

The storage sheds and the cold store are equipped with intelligent locks. This way you can only grant authorised persons the right to enter a room and prevent unauthorised persons from simply entering. For example, does someone work in the restaurant? Then you can give them access to the to the rooms where they have the equipment they need to prepare and serve food and drinks.

Time registration

In addition to smart locks, Golden Rock Resorts will soon be using EasySecure's time and attendance solution. EasySecure has already supplied three devices that allow users to indicate when they start and end work by fingerprint. Moreover, the barrier of the electric fence around the facility will soon be equipped with an intercom system and a card reader from EasySecure. A guest who has checked in will be able to use their card to open the gate.

Courtesy and quality

Golden Rock especially appreciates the friendliness, quality and speed of EasySecure. "If something is wrong and you call them, they take care of it immediately. For instance, if we have a problem with the system in a room, they don't hesitate to provide us with a few extra pair of hands to solve the problem. They think about the big picture and extra pair of hands to solve the problem.
