PROJECT REGISTRATION
VISITOR MANAGEMENT

The standard solution in the world of care and welfare

Full control of access,
time and attendance registration

Less time, lower costs and fully in control.

A healthcare building has many functions. Hospitality plays an important role. On the other hand, it is very important that no one enters places where they should not have access. It sounds so logical, but how do you arrange that? Employees should be able to enter areas where guests, patients, clients and visitors are not allowed 24 hours a day. Access should be regulated for patients, nurses, doctors, agency staff, visitors, volunteers, long-stay visitors, suppliers, cleaning and mechanics.

From a single lock on a door to tens of thousands of locks across multiple locations, all conveniently managed in one comprehensive overview.

Advantages EasySecure

- Easily assign access to individuals
- Integratable with proprietary software
- Strong in multiple site management
- Visitor pre-registration
- Real-time insight into time registration and attendance
- Cost-saving

Why EasySecure?

More safety and overview

Attendance records are a legal requirement for many organisations. In the event of emergency, presence must be traceable within a few seconds. With EasySecure's simple overviews, you can create an overview of who has been where and when in no time.

Integrated solution

EasySecure opts for integration, ensuring the ideal composition. You choose the best solutions specifically tailored to your type of organisation.

For example, integrate with your Azure Active Directory and import all employees and send a mobile card in one go. Simple, fast and secure!

Wireless access control

Expand your current access control system and operate more doors with your existing (mobile) access cards and EasySecure Software. Replace existing door handles and cylinders for our wireless system and take security to the next level without additional cabling.

Insight always and everywhere

With EasySecure Cloud software, we offer one package for your access control, time and attendance registration at one or more locations. This way you keep overview and employees can move effortlessly between different sites.

User-friendly

Access control should not only be arranged easily and securely, but above all should not be a time-consuming task. A simple and user-friendly interface that everyone can get used to. EasySecure is useful for everyone!

Flexible access control

With overviews in the software, it is now possible to see at a glance and determine who has access at which locations.

Registration is possible by mobile phone, card, finger, face, QR, license plate and access code. That's all you need!

**The proven, international solution in
the world of care and welfare.**

Access control and time registration in the world of care and welfare.

A hospital, healthcare facility or other building in the world of care and welfare has various spaces. There are many different areas such as storage, changing rooms, kitchens, laboratories and offices. Proper registration can buy a lot of clarity in these complex environments. Access should not only be arranged easily and securely, but above all not be a time-consuming activity.

Attendance records are a legal duty for many organisations. For their own safety, but also for someone else's. In case of emergencies, people want to see who is present at the push of a button. The attendance overview can be called from anywhere via desktop, tablet or your smartphone.

Time registration and access via:

Mobile card (NFC and BLE)

Card and Chip

Fingerprint

Registration number

Facial recognition

License plate recognition

QR-code

Advantages

- ✓ Safe and clear
- ✓ Management in the cloud
- ✓ More control, less cost
- ✓ Real-time visibility everywhere

Save time and money.

A hospital, healthcare facility or other building in the world of care and welfare has various spaces.

- ✓ Digital recording of hours, remuneration and payment with dozens of integration options.
- ✓ Easily grant or exclude access.
- ✓ GDPR -proof according to legal requirements.
- ✓ User-friendly and accessible to all.
- ✓ More security, less worry.

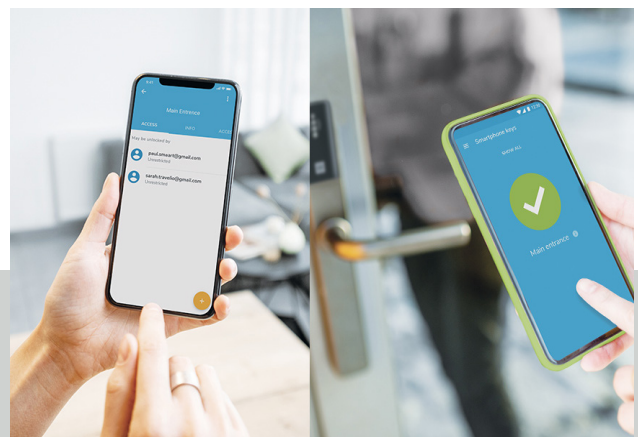

Use Case:

Rijndam Rehabilitation

Where access control needs to be hassle-free and completely reliable.

In a world where quality and patient-centred care is key, Rijndam Rehabilitation, a leading institute for specialist medical rehabilitation of children, adolescents, adults and the elderly, has recently launched EasySecure. At Rijndam Rehabilitation, access and attendance control plays a crucial role in ensuring a safe and workable environment at Rijndam, which has several locations in the Rijnmond and Drechtsteden region. Locations where living and working come together.

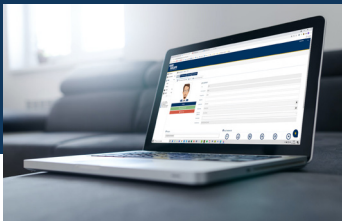

Rijndam Rehabilitation is an established name in the world of patient-centred care. Over the years, they have considered relocating. However, that proved to be a costly investment. Safety of staff, clients, data and technology cannot be economised on. Rijndam searched for a solution and came across EasySecure via an installation partner. By integrating modern technologies, this system enables Rijndam to assign tailor-made access rights to employees, volunteers and other stakeholders. The result is a flexible and secure working environment.

“EasySecure has taken a lot of work out of our hands, by automating manual tasks and incorporating them conveniently into one system. We can now invest our time elsewhere to increase the quality of care.”

Complete control of all areas at your location anytime, anywhere?

With our web-based solution, you always and everywhere have control over who has access to specific rooms and who you want to exclude. We call this safe and secure and it complies with all set laws and regulations.

“EasySecure offers us high ease of use for all our employees and visitors. It is a very useful application with useful real-time management information, so we know who is present or already clocked out.”
