SUPREMA HARDWARE

BIOENTRY W2

ART. 210110

The Suprema BioEntry W2 is a robust fingerprint scanner for access control with the latest biometric technology. The W2 is suitable for indoor and outdoor use (IP67 certified). Its robust housing is vandal-proof with an IK09 classification. This terminal has a card reader that can register up to 500,000 users.

Power over Ethernet

Registration with:

BIOLITE N2

ART. 210088

The BioLite N2 has a finger and multi-card reader and a keypad as well. It ensures accurate access control as well as time registration and attendance recording. IP67 certified dust and water protection ensures that this terminal can be placed under all climatic situations. The scanner communicates with smartphones so that they can be used as cards.

Registration with:

X-STATION 2

ART. 210113

The X-Station 2 is a versatile intelligent time and attendance terminal that supports registration with RFID cards, mobile phones, and codes. The X-Station 2 offers ultimate standards in terms of flexibility.

Power over Ethernet

Registration with:

X-STATION 2 - FINGER SCANNER

ART. 210118

The X-Station 2 is a versatile intelligent time and attendance terminal that supports registration with finger scan, RFID cards, smartphone, and codes. The X-Station 2 offers ultimate standards in terms of flexibility.

Power over Ethernet

Registration with:

BioStation 3

ART. 200197

Face recognition for indoor and outdoor use. This extremely fast terminal can be used for access control, time registration and attendance. In addition to facial recognition, it is also possible to register by mobile phone, card and/or (QR) code.

Power over Ethernet

Registration with:     

FACELITE

ART. 210087

The Suprema FaceLite is a compact terminal with an excellent recognition function. The FaceLite offers unsurpassed matching speed and accuracy. Thanks to its unique technology, reliable identification is possible day and night likewise.

Registration with:   

FACESTATION F2

ART. 210101

Face recognition for indoor and outdoor use with IP65 protection! This high-speed terminal is suitable for access control, time registration, and attendance. In addition to facial recognition, registration with mobile phone, card and code is also possible.

Registration with:    

FACESTATION F2 - FINGER SCANNER

ART. 210102

Face recognition for indoor and outdoor use with protection class IP65! This high-speed terminal is suitable for access control, time registration and attendance. In addition to facial recognition, registration via mobile phone, card, code, and finger scan is also possible.

Registration with:     

FACESTATION 2

ART. 210085

The FaceStation 2 is one of the fastest and most modern face recognition terminals in the world. This high-speed terminal is suitable for access control, time registration, and attendance. In addition to facial recognition, cards and codes can also be used for registration.

Registration with:   

XPASS 2 - SLIM

ART. 210330

The XPass 2 is a multi-card reader for indoor and outdoor use. The scanner has an IP67 and IK08 rating, making it vandal-proof and suitable for installation in all climatic conditions. The scanner also has BLE and NFC so that the smartphone can be used as an access card.

Power over Ethernet

Registration with:

XPASS 2 - WIDE

ART. 210338

The XPass 2 is a multi-card reader for indoor and outdoor use. The scanner has an IP67 and IK08 rating, making it vandal-proof and suitable for installation in all climatic conditions. The scanner also has BLE and NFC so that the smartphone can be used as an access card.

Power over Ethernet

Registration with:

XPASS 2 - WIDE WITH NUMBER FIELD

ART. 210331

The XPass 2 is a multi-card reader for indoor and outdoor use. The scanner has an IP67 and IK08 rating, making it vandal-proof and suitable for installation in all climatic conditions. The scanner also has BLE and NFC so that the smartphone can be used as an access card.

Power over Ethernet

Registration with:

DOM HARDWARE

DOM CYLINDER

ART. 699993

With the highest security certifications, such as VDS, SKG, IP, T90, this cylinder meets all European EN-standards. The Plug & Play system offers you flexibility with only a few components, providing you with the right solution for every situation. With 10 different versions, we can handle almost any door situation.

Registration with:

DOM GUARD / DOM GUARD S

ART. 699992 / 699996

The ENiQ Guard is the new digital door handle from DOM. In Guard we combine design with durability and security. The robust protective fittings are not only visually appealing, but they also have a long service life and are absolutely secure. And: they are installed in no time at all!

Registration with:

DOM LOQ

ART. 699989

With the DOM LoQ you can easily integrate your lockers or deposit-boxes into your EasySecure software environment. With a card or chip, users can open lockers, cabinets, and deposit-boxes, but also control doors and gates.

Registration with:

DOM PADLOCK

ART. 699994

With the DOM Padlock it is possible to add a digital padlock to your EasySecure software environment. With the same card or chip, padlocks can be placed and used where you need them.

Registration with:

DOM ACCESSMANAGER

ART. 699990

The DOM EniQ Access Manager gives you even more freedom and control. From simply opening sliding doors to opening gates and barrier gates. With the DOM ENiQ Access Manager, your wall readers and terminals act as additional security personnel in your building. This product makes everyday life easier for you and your users.

Power over Ethernet

Registration with:

DOM NETMANAGER

ART. 699997

The DOM NetManager is a communication module that ensures that all lock solutions are connected to the network and that all changes to access regulations can be updated. The RF NetManager communicates wirelessly with the terminal devices. This enables all the advantages of online management of the access control systems.

Power over Ethernet

AXIS HARDWARE (number plate registration)

AXIS CAMERA -1445-LE

ART. AXIS01

- HDTV 1080 quality
- Remote zoom
- Vandalism protection class IK10
- Operates in temperatures from -40 to 60 degrees Celsius
- 2 MP at 30 fps

Power over Ethernet

AXIS CAMERA - P3245-V

ART. AXIS02

- HDTV 1080 quality
- Vandalism protection class IK10
- Operates in temperatures from 0 to 50 degrees Celsius
- 2 MP at 30 fps

Power over Ethernet

AXIS CONTROLLER - A1601

ART. AXIS03

- Automatic door opening
- Can be integrated with EasySecure
- 2 cameras can be connected

Power over Ethernet

iLOQ HARDWARE

iLOQ S50 CYLINDER

ART. 800006

Battery-free programmable electromechanical lock cylinder for iLOQ S50 locking system. NFC-powered: no batteries required for the lock. Opening with NFC enabled Android and iOS mobile phones or iLOQ K55S Key Fob.

Registration with:

iLOQ S5 CYLINDER

ART. 800007

The unique iLOQ cylinder is self-powered by harvesting electricity from key insertion. Lock acts as a part of D2D network which allows easy updates to blocked keys list. Surface treatments: brushed steel, brushed brass, polished brass.

Registration with:

iLOQ HARDWARE

iLOQ PADLOCK

ART. 800008

The battery-free digital NFC padlock is opened with NFC-compatible mobile devices and iLOQ key fobs. It allows flexibility when locks are located on remote locations. Available in three different shackle lengths (25mm/60mm/110mm). Opening and closing with user credentials.

Registration with:

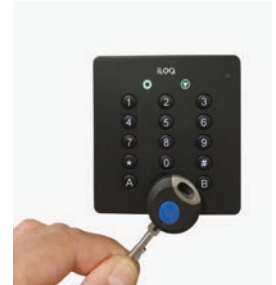

iLOQ WALL READER

ART. 800009

The iLOQ N505i NFC/PIN Wall Reader is connected to the reader bus of the iLOQ N502 Online- or N503 Offline Door Module, or to the chain bus of the iLOQ N507 Online I/O Module to control electronic devices. The N505i can also be connected directly to the main bus of the iLOQ N500 Net Bridge to work as a HotSpot for updating keys.

iLOQ NFC Readers use NFC technology to read and write data to iLOQ S5 and iLOQ S50 keys, but also Mifare RFID tags can be read.

Power over Ethernet

Registration with:

SUPREMA HARDWARE

Our standard models always come with a multi-card reader, thus EM, Mifare, DESfire EV1 and EV2 cards can be used alike. For products where this is not the case, the accepted card type is indicated in the description. We also have special models with additional iClass and HID card readers.
