### Always the perfect solution!

All hardware in this brochure can be linked together. This way you will always have the perfect solution to fit your situation.

### SAFE & RELIABLE

- Access control
- Time registration
- Attendance registration
- Visitor registration
- Project registration

### FLEXIBLE

- Easy to expand
- Simple integration

### IN- & OUTDOOR

- IK09 - vandal-proof
- IP65 & IP67 - dust and waterproof

Our Suprema scanners have the latest and fastest finger scan technology. With high precision, it recognizes the fingerprint within one second.

Our scanners convert fingerprints into an algorithmic template that is untraceable. This unique template is never relatable to an image or scan of the fingerprint. This recognition is safe, personal, and unique.

## BIOENTRY P2

The BioEntry P2 uses the latest biometric technology and has high-speed recognition in a beautiful design. Besides, the biometrics technology this scanner also has a multi-card reader and NFC possibilities.

Access with:

# Airfob Patch

The Suprema Airfob Patch is a device that mounts easily to existing RF card readers. This makes existing readers available for Mobile Credentials and makes the smartphone a personal key.

- Works without battery
- Easy mountable
- Translates Bluetooth to the RF card reader
- iOS & Android

Want to know more? [Contact Us.](#)

# BIOENTRY W2

The Supreme BioEntry W2 is a robust finger scanner for access control with the best biometric technology. The W2 is made for in- and out-door (IP67 valued). This robust case is vandal-proof with an IK09 value. The W2 has a finger scanner and can read cards as well. It has a memory that can save up to 500.000 users.

Access with:   

# BIOLITE N2

The BioLite N2 has a finger scanner, code, and multi-card reader, which has accurate access control, time, and attendance registration. The IP67 valued water and dust resistance code makes this reader useable in every climate. This scanner also communicates with smartphone, so this can be used as a key as well. The N2 is also available without biometrics.

Registration with:    

## Premium Design

### **All-in-one solution**

All our time registration solutions are multifunctional. All terminals are suitable for time registration, attendance, and access control

## BIOSTATION L2

The compact BioStation L2 has a code, finger scanner, and card reader. Up to 500.000 users can be stored in the L2's memory.

## XPASS 2

Besides its sleek appearance, the modern XPass 2 is also very advanced in its technology.

The XPass 2 is a multi-card reader for indoor and outdoor use. The scanner is rated IP67 and IK08 making the scanner vandal resistant and suitable for mounting in all climatic conditions.

The scanner also has a BLE and NFC function, which makes it possible to use a mobile phone as an access card.

The XPass 2 is available in 3 models: for mounting on a frame (MDPB), on a flush-mounted box, with or without a code panel (GKDPB & GKPB).

-  Mobile card (NFC and BLE)
-  PoE - Power of Ethernet
-  IP67 - Dust and waterproof
-  IK08 - Vandal-proof
-  Multi-card reader

Access with:   

**WATERPROOF &  
VANDAL-PROOF**  
IK08 & IP67 Valued

# DIGITAL LOCKS

---

## DOM CYLINDER

Take your existing security system to the next level with the DOM wireless cylinders. With this upgrade, you can digitally expand your current system with doors and other access points that could not be managed before.

With the highest safety certifications, such as VDS, SKG, IP, T90, this cylinder meets all European EN standards. The Plug & Play system offers you flexibility, with only a few parts that always immediately provide the right fit. With 10 different versions, we have a solution for almost every door situation.

## DOM GUARD

The ENiQ Guard is the new digital door fitting from DOM. The Guard links design to durability and safety. The robust Guard hardware is not only beautiful, it also has a long service life and is absolutely safe. And: installation is really easy!

## DOM LOQ

With the DOM LoQ you can easily integrate your lockers or cabinets into your EasySecure software. With the same card or tag, your users can open the doors in the building and also open their locker to store their valuables.

## DOM PADLOCK

With the DOM Padlock it is possible to add a digital padlock in your EasySecure software. With the same card or tag, your users can place and open padlocks where needed.

More and more institutions and companies are opting for digital access management. The two main advantages: users open and close doors comfortably with a tag, and as an administrator you have full control over the access within your location.

The use of wireless lock technology and digital keys as an alternative to physical keys has increased significantly worldwide in recent years. Digital keys are cost-effective, and wireless locks now offer the same capabilities that were previously only available through wired doors, at a much lower cost.

- Rapid implementation
- No cabling
- Easy to place on any door
- No damage after installation

# LICENSE PLATE REGISTRATION

Axis license plate registration cameras work easily with our EasySecure Software. This system provides an automated access system and exit management for vehicles. With the push of a button, you register a license plate number in the software and determine where and when a vehicle may enter.

**Axis P1445-LE Camera**

- HDTV 1080
- Remote zoom
- Vandalproof IK10
- Works between -40 and 60 degrees Celcius
- 2 MP at 30 fps

**Axis P3245-V Camera**

- HDTV 1080
- Vandalproof IK10
- works between 0 and 50 degrees Celcius
- 2 MP bat 30 fps

**Axis A1601 Network Door Controller**

- Automatic door opener
- Integrable with EasySecure Software
